# 1 Introducere

Diagrama conceptuală și diagrama entitate-relație utilizate în această temă sunt mai jos. Datele de test folosite sunt cele utilizate în tema 1 și cele de la finalul acestui document.

### 3 Exercițiul 7

Problema 7 din *Laborator1.PLSQL.pdf* spune: *Determinați salariul anual și bonusul pe care îl primește un salariat al cărui cod este dat de la tastatură. Bonusul este determinat astfel: dacă salariul anual este cel puțin 200001, atunci bonusul este 20000; dacă salariul anual este cel puțin 100001 și cel mult 200000, atunci bonusul este 10000, iar dacă salariul anual este cel mult 100000, atunci bonusul este 5000. Afișați bonusul obținut. Comentați cazul în care nu există niciun angajat cu codul introdus. Adaptând cerința la structura utilizată vom rezolva următoarea cerință: Determinați câte rezervări există pentru o anumită categorie de filme și calculați reducerea/scumpirea la toate rezervările din acea categorie: 0-50 rezervări (+10%); 50-150 rezervări (0%); 150-300 rezervări (-5%); 300+ rezervări (-10%)*

Problema 9 din *Laborator1\_PLSQL.pdf* spune: *Scrieți un bloc PLSQL în care stocați prin variabile de substituție un cod de angajat, un cod de departament și procentul cu care se mărește salariul acestuia. Să se mute salariatul în noul departament și să i se crească salariul în mod corespunzător. Dacă modificarea s-a putut realiza (există în tabelul emp\_\*\*\* un salariat având codul respectiv) să se afișeze mesajul “Actualizare realizata”, iar în caz contrar mesajul “Nu exista un angajat cu acest cod”.
